LinkedIn: <https://www.linkedin.com/in/engrwaseem566/>

Results-driven Electrical Engineer skilled in circuit design, microcontroller programming and C++ programming. Proven ability to deliver projects on time and within budget, leveraging expertise in industry-standard software and programming languages. Adept at troubleshooting, problem-solving, and collaborating with cross-functional teams to achieve project goals. Eager to apply technical knowledge and passion for innovation to drive impactful solutions in the electrical engineering field.

EDUCATION

Pak-Austria Fachhochschule: Institute of Applied Sciences and Technology

Haripur, Pakistan

BE Electrical Engineering

2020 – 20

Relevant Coursework: Electronic Circuit Design, Electrical Machines, Electromagnetic Field Theory, Communication Systems, Digital Signal Processing, Linear Control Systems, Instrumentation and Measurements, Power Electronics and Drives, Computer Communication Networks, programming, Object oriented programming, Data structure and algorithm, Embedded system, Digital system design, and IC designing.

PROFESSIONAL EXPERIENCE

National Institute of Electronics (NIE)

Islamabad, Pakistan

Electrical Engineering Intern

01/08/2022– 12/09/2022

Internee at Wireless Sensor Networks Lab work with deferent sensors individual as well as a team member. Successfully implemented ESP32-based wireless communication protocols for data transmission between multiple microcontrollers.

Collaborated effectively with a team of engineers on the development of a microcontroller-based audio player hardware with sound amplifier, demonstrating strong teamwork and problem-solving skills.

Dargai (Malakand-II) Hydropower Plant (MHPP-II)

Dargai, Pakistan

Electrical Engineering Intern

13/08/2021– 05/09/2021

Assisted in Operational Monitoring: Participated in the day-to-day monitoring of the 20 MW Malakand-II Hydropower Plant, ensuring optimal performance and efficiency in power generation.

Data Analysis and Reporting: Conducted data analysis on plant performance metrics and contributed to technical reports, supporting decision-making processes for maintenance and operational improvements.

Hands-on Experience with Hydropower Technology: Gained practical experience in hydropower technology, including turbine operation, control systems, and routine maintenance procedures to ensure uninterrupted power supply.

StepNex Services

Peshawar, Pakistan

Summer Intern

01/07/2021–11/08/2021

Executed Manual Testing: Performed manual testing on software applications to identify bugs and inconsistencies, contributing to the overall quality assurance process.

Data Entry for Test Cases: Accurately entered and managed large volumes of test data, ensuring all test cases were properly documented and ready for execution by the QA team.

Collaboration with Development Teams: Worked closely with software developers to understand requirements and provide feedback on test results, supporting the continuous improvement of software products.

PLC Group
Electrical Engineering Intern

Islamabad, Pakistan
01/08/2023– 12/09/2023

Sensor and Voltage Connections: Successfully connected and configured sensors with Programmable Logic Controllers (PLCs), ensuring accurate voltage connections for reliable data acquisition.

Unit Preparation: Assisted in the preparation and setup of PLC units, component assembly, and imager installation.

Data Testing and Validation: Conducted rigorous testing and validation of data collected from PLCcontrolled systems, ensuring the accuracy and reliability of automated processes.

PROJECTS

FINAL YEAR PROJECT(FYP):

For my final year project, I developed a predictive model to assess the health of lead-acid batteries using machine learning techniques. The project involved analyzing key parameters such as battery current, voltage, and temperature to accurately determine the State of Health (SOH) of the batteries. By leveraging historical data and machine learning algorithms, the model was able to predict battery degradation in real-time, allowing for early detection and timely maintenance or replacement. The model achieved high accuracy.

SEMESTER PROJECTS:

- **Line Follower Robot using Arduino:** Designed and programmed a robot that follows a designated path using infrared sensors and Arduino microcontroller.
- **Wireless Energy Transfer:** Developed a system for wireless power transmission, focusing on efficiency and safety.
- **Radio Transmitter:** Built and tested a radio transmitter for short-range communication, adhering to relevant technical standards.

CORE COMPETENCIES

- Problem-Solving
- Cross-Functional Collaboration & Leadership
- Adaptability
- IOT Automation
- Circuit Design & Analysis
- Algorithms and Programming
- Designing management

ADDITIONAL INFORMATION

- **Nationality/Work Authorization:** Pakistan
- **Languages:** Pashto (Native), Urdu (Native), English (C1)

- Proficient in Microsoft Excel, Microsoft Word, Microsoft PowerPoint, MATLAB/Simulink, AutoCAD 2D -3D, Circuit Design: LTspice, Proteus, Cadence
- **Programing Languages:** Python, Verilog , C++, C#.
